You think water moves fast? *You should see ice.* It moves like it has a mind. Like it knows it killed the world once and got a taste for murder. *After the avalanche, it took us a week to climb out.* Now, I don't know exactly *when* we turned on each other, but I know that seven of us survived the slide... and only five made it out. *Now we took an oath, that I'm breaking now. We said we'd say it was the snow that killed the other two, but it wasn't.* Nature is lethal but it doesn't hold a candle to man. However unreal *it may seem*, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get *sick*, I do. That's also *clear*.

[1] No?

[2] speaking of unreal...

[3] Yes, sick.

Changes by green author

The lysine contingency - it's intended to prevent the spread of the animals is case they ever got off the island. Dr. Wu inserted a gene *tahtthat*^{Green} makes a *single*^{Green} faulty enzyme in protein metabolism. The animals can't manufacture the amino acid lysine. Unless *they're continually*^{Green} supplied with lysine by us, they'll slip into a coma and die. We're on the same curve, just on opposite ends. However unreal *it may seem*, we are connected, you and I. You don't get *sick*, I do. That's also *clear*^{Green}.

[Green 1] speaking of unreal...

[Green 2] Yes, sick.

Changes by orange author with some comments

Now that we know who you are, I know who I am. *I'm not a mistake!* It all makes sense! In a comic, you know how you can tell who the arch-villain's going to be? *He's the exact opposite of the hero. And most times they're friends, like you and me!*^{OA} I should've known way back when... You know why, David? They called me Mr Glass. However unreal *it may seem*, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get *sick*, I do. That's also *clear*^{OA}.

[OA 1] Yeah, I like animals better than people sometimes...

[OA 2] Especially dogs. Dogs are the best.

[OA 3] just nice

[OA 4] Yes, sick.

No changes

Your bones don't break, mine do. **That's clear.** Your cells react to bacteria and viruses differently than mine. *You don't get sick, I do.* That's also clear. *But for some reason, you and I react the exact same way to water.* We swallow it too fast, we choke. *We get some in our lungs, we drown.* However unreal *it may seem*, we are connected, you and I. We're on the same curve, just on opposite ends. You don't get sick, I do. That's also clear.
